Legal and regulatory issues	None		
Patient Engagement Issues	None		

Chair's Report - May 2016

1. New Governing Body Members

We are delighted to welcome our two new elected clinical leads Dr Igodo and Dr Khan to the Governing Body. They started in April and have special interests in Long Term Conditions and bring us much enthusiasm and energy as well as increasing capacity within our clinical team. I would also like to welcome David Allcock as our Lay Member for Patient and Public Involvement and I very much look forward to working with our new Governing Body members.

2. Clinical Hubs

We plan to expand on our four clinical hubs by aligning an elected clinical lead to each hub. The team will work together to enhance clinical engagement within the multi-disciplinary team with the aim of improving communications between the hub team, our members and the CCG. Any specific issues related to the hub will be identified so that a more local targeted approach can be devised to address and help resolve these issues locally.

3. Members' Meeting

A Members' Meeting took place in April and the main theme was the QIPP agenda. Our members and the Local Medical Committee (LMC) were broadly supportive of this and also contributed other ideas to enhance care for our patient population. We also had a discussion looking at the sustainability of General Practice.

Deryth Stevens
Chair, Warwickshire North CCG
